**Aerospace News** – The new emphasis by the U.S. on Asia-Pacific operations will require the U.S. to improve equipment in the region and likely direct more personnel there, Defense Secretary Leon Panetta says. In addition, the U.S. must "invest in new technologies that will help us build a stronger power projection" in the region, he said ... Hawker Beechcraft is considering selling the company, says a lawyer for the aircraft manufacturer. "We intend to emerge from Chapter 11 as an independent company," said Nicole Alexander, a spokeswoman for Hawker Beechcraft. "But as is the case with every other company, we must constantly evaluate all of our options in order to be positioned for the future" ... Defense companies are already feeling the effect of \$500 billion in impending budget cuts, says Marion Blakey, president and CEO of the Aerospace Industries Association. In a recent AIA board

meeting, she says, 250 CEOs of aerospace and defense firms spoke about job losses now underway. "The very unfortunate news is that they are already having to lay off workers and salaried employees," Blakey said. "These are good, high-paying jobs" ... The Army wants to replace more than 3,000 armored vehicles in a plan that will cost \$1.7 billion and may issue a request for proposal in the first quarter of next year. Intelsat could launch the Falcon Heavy rocket as early as 2017, a source says ... Defense contractors are protesting the possibility of sequestration, with Lockheed Martin and others saying they will have to lay off employees in the wake of possible additional defense cuts. Layoffs at large contractors could lead to turmoil at smaller firms as well. "The broader contracting community understands that there will be waves of repercussions from what the big [prime contractors] have to do," said Marion Blakey, president and CEO of the Aerospace Industries Association ... Jim Albaugh, president and CEO of Boeing Commercial Airplanes, says an emerging threat to Boeing and Airbus will come from China's Comac. "Competition is a great thing. Airbus coming along made Boeing a better company. And Comac will make both Boeing and Airbus better at what we do," Albaugh said.

I suppose this would be a testimonial. Since June of 2008, I have been gainfully and continually employed as a contractor/consultant with the same company. I found this job through your website and am very grateful for the services you provide members.

Eventually, however, some good things have to come to an end. This long running contract position could be coming to an end. As soon as I heard about this possibility, I immediately renewed my membership with *CJHunter*. If necessary, I am confident I will be able to find my next position through your website. Thank you again. — **Tom Knowles, Electrical Design Engineer, Brookline, New Hampshire**
